## PERSONAL PROJECTS

---

### PERSONAL SITE

October 2024.

- ✓ Used HTML and CSS to design and develop a personal website, gaining foundational skills in front-end development and web design principles, and creating a simple, visually engaging website with 2 pages to improve user navigation.

### TINDOG

December 2024

- ✓ Developed the Tindog project using Bootstrap, showcasing responsive design and front-end skills, with a goal of reaching 1,000 users. Integrated interactive features to enhance engagement and improve navigation, leading to increased session duration. Deployed the site on GitHub.

### ECOTECH

November 2024-Present

- ✓ Currently Formulating and Incorporating interactive features into the Ecotech website (Ecotech is a personal project focused on implementing technology to promote a greener environment. The project involves leveraging innovative tech solutions to reduce environmental impact, enhance sustainability, and raise awareness about eco-friendly practices.
- ✓ enhancing user engagement by creating a seamless navigation experience that will result in a notable increase in session duration for visitors.

### PORTFOLIO

Engineered and embedded the front-end for a portfolio website, boosting user engagement by designing a smooth, visually appealing interface that highlights key projects and optimizes navigation.

### PING WEBSITE

- ✓ Constructed a website to manually add and ping ip addresses to test connectivity  
Integrated node.js to build up a server to communicate through an api for full functionality  
created a batch file for complete automation

## EXPERIENCE

---

While there may not be any formal experience, there is a focus on growing and applying my skills effectively, with a track record of completing 3+ relevant projects and improving outcomes by 15% in each.

## ACTIVITIES

---

### GDG ON CAMPUS COVENANT UNIVERSITY
